DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 28, 30, 31, and 33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 28 has been amended to include the phrase "at least in part" in reference to the outer coating. There is no clear support in the specification for an outer layer being formed "at least in part" of one of these compositions. This alludes clearly to the presence of additional materials in the outer layer. Applicant makes no known reference to any material other that those specifically named in the instant specification being in the outer layer. Applicant also refers to the necessity of the outer layer being made of these materials to perform the desired function of forming a hydrate or hydroxide compound upon contact with an oxygen-containing environment. Applicant does not appear to establish any basis for additional materials, nor does applicant make any such materials known.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3, 4, 7-10, 12-16, and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant has amended claim 1 to specify that the bilayer is made of two

Art Unit: 1775

different materials, but does not clarify whether the bilayer is formed of a first layer of a first ceramic material and a second layer of a second ceramic material different from the first ceramic material.

Regarding claim 31, claim 1 requires the outer layer to be nanocrystalline, while dependant claim 31 states "at least in part of a nanocrystalline". Please clarify.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aita et al (US 5,472,795). Please see the previous office action for the text of the rejection.

Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aita et al (US 5,472,795) in view of Davidson (US 5,782,910). Please see the previous office action for the text of the rejection.

Response to Arguments

Applicant's arguments and amendments have overcome the rejection of Aita '795 in reference to claims 1, 3, 4, 7, 8, and 12-16, as well as the rejection of claims 28, 30, and 33 over Aita '795 in view of Davidson '910. However, applicant's amendments have necessitated the 112 first paragraph rejection (above), and also did not overcome the 112 second paragraph rejection of claims 1, 3, 4, 7-10, and 12-16 (reiterated above).

Art Unit: 1775

Regarding the 103 rejections over Aita and also Aita in view of Davidson, applicant argues that Aita does not teach a nanocrystalline outer layer. This argument is not commensurate with the claims, as claims 18 and 27 do not reflect "nanocrystalline".

Allowable Subject Matter

Claims 9 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 21-26 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP \$ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
